EXPERIENCE

Lead Ruby on Rails Developer / Full-Stack Software Engineer, Ditto.com

- ⚡ Created Eyewear rental program (“Endless Eyewear”) from scratch using Ruby on Rails, HTML/CSS, JS. Started as Junior Dev and shortly was promoted to be Lead Dev overseeing entire platform.
- ⚡ Created favorites page for users, which is now one of our most popular features.
- ⚡ Upgraded pages to be responsive. Created scrolling & other UI elements for mobile.
- ⚡ Implemented Unit Testing and Integration testing Rspec and Capybara (Selenium wrapper).
- ⚡ Created a flow of emails to for initial subscribers using Sailthru. Conversions increased markedly.

Jan 2015 - Present

Web Developer & Webmaster, Montclair Construction

- ⚡ Implemented proper semantic HTML and SEO best practices which resulted in increased traffic to the company’s website by 25% & inbound phone calls by 15%.

November 2013 - May 2014

Front End Developer, United for Human Rights

- ⚡ Identified excessive traffic from dubious websites; implemented a CAPTCHA-like solution which saved tens of thousands in shipping of large educational package costs to false leads.

March 2013 - November 2013

Front End Developer, Golden Era Productions

- ⚡ Used data from site analytics to create dynamic Ads which increased conversions by 300%.
- ⚡ Managed i18nization of sites into 17 languages. I spotted overwritten translations early on, traced them to duplicate keys across XML files and de-duplicated the keys using an ID system.
- ⚡ Created language and browser-specific CSS files for proper presentation on all platforms and languages.

March 2012 - February 2013

Junior Web Developer, Foundation for a Drug-Free World

- ⚡ Created pages from Photoshop Designs. Integrated 3rd party API for embedded docs.

June 2011 - March 2012

SKILLS

Ruby, Ruby on Rails, Javascript, jQuery, Backbone.js, SQL, Git, HTML5, CSS3, LESS, Bootstrap, RSpec, Object-oriented Design, MVC Pattern, REST APIs, Third party APIs, AJAX, Agile Development, Active Record

SOLO-PROJECTS

Asteroids (Javascript) | [Live](#) | [Source code](#)

- ⚡ All Objects in game inherit from base class MovingObject using custom polyfill method to achieve proper prototypical inheritance in the absence of ECMA5 Object.create(). Uses HTML5 Canvas for display.

OmniFive (Rails & Backbone) | [Live](#) | [Source code](#)

- ⚡ E-commerce site to sell or buy things for \$5. Uses API endpoints with Backbone for lightning fast loads.
